ENDANGERED SPECIES ACT REQUIREMENTS

What is the Endangered Species Act? The Endangered Species Act, Bill 108 (ESA) is a new Act that replaces the old ESA. The new ESA protects three times as many species as the old Act; uses science-based decision-making for status assessment of species at risk, protects both species and habitat; recognizes the importance of private land stewardship activities; recognizes Aboriginal interests and includes “flexibility tools” – permits, agreements, for a range of activities otherwise prohibited under the act. These tools enable activities that would not otherwise be permitted, as long as the intent is stewardship, protection, or rehabilitation of the species.

There are a range of municipal activities which potentially affect the Endangered Species Act and Species at Risk (SAR) and their habitats. These are:

- Planning and development application review;
- Infrastructure projects such as roads and buildings;
- Maintenance activities such as rights of way and drains.

The Endangered Species Act and the Provincial Policy Statement (PPS) each provide for the protection of Species at Risk and their habitats, but there are some key differences. The intent is for the definition of significant habitat (PPS 2005) and general habitat (ESA 2007) to protect the same habitat. The Ministry of Natural Resources (MNR) has authority to update significant habitat under the PPS as new information becomes available. The Ministry of Natural Resources will work closely with the planning authority and the Ministry of Municipal Affairs and Housing (MMAH) to help achieve coordination of Endangered Species Act 2007 and Planning Act (PA) processes. The Ministry of Natural Resources will advise municipalities and proponents on matters related to the Endangered Species Act.

There are four ways in which endangered species can be classified:

- Special Concern
- Threatened
- Endangered
- Extirpated

Once species are classified “at risk”, they are added to the Species at Risk in Ontario (SARO) List.

What does this mean to you, the applicant?

It is important that you be aware of the foregoing information and educate yourself on the Endangered Species Act and how it may affect your development application. As the applicant, it will be at your discretion to undertake an informal assessment of your property to get a better understanding of the type of species that inhabit your property and if any of these species are classified as species at risk, as noted above. This will then help you to determine if there is a need for a formal assessment to accompany your development application. For further clarification you can speak to one of the Planners in the Planning Department or contact the MNR District Office Species at Risk Biologist or District Planner or visit the MNR SAR website:

<https://www.ontario.ca/page/species-risk> .

The Ministry of Natural Resources recommends that municipalities advise proponents to undertake a preliminary ecological site assessment for Species at Risk and their habitat. Proponents seeking approvals under the Planning Act are responsible for ensuring they follow all relevant laws in Ontario, including the Endangered Species Act. Proponents should continue to follow early consultation and application procedures in place for the One Window Planning Service and Municipal Plan Review. Proponents should consult with the municipality/Conservation Authority and MNR as appropriate, to determine what Endangered and Threatened species information is available. The Species at Risk (SARO) list is the primary source of information about the status of species at risk in Ontario. MNR's Natural Heritage Information Centre is the central provincial database for species at risk occurrence information.
